Center for Simulation and Integrated Healthcare Education

Clinical Boot Camps

Immersive Simulation Training for Healthcare Providers

Clinical Boot Camps

ABIA's Center for Simulation and Integrated Healthcare Education (CSIHE) Clinical Boot Camps accelerate the acquisition of key skills that translate into confidence, competency and improved patient care. Designed to reinforce cognitive and procedural learning through dynamic simulation exercises, CSIHE's Boot Camps offer healthcare providers the most comprehensive and immersive simulation training available.

Overview

Clinical Boot Camps provide students and healthcare professionals the crucial training needed to make a successful transition from classroom to career, or to more advanced levels of practice. Participants can gain experience in basic skills, refresh and practice previously acquired skills, or learn advanced techniques, procedures, and protocols.

CSIHE creates customized Boot Camps to meet training needs of all healthcare disciplines and interprofessional teams.

Examples of Procedures and Skills Included in Boot Camps:

- Communication Skills
- Physical Examination and Assessment
- Interviewing Techniques
- Decision-Making
- Crisis Resource Management
- Lumbar Puncture
- Central Venous Catheterization
- IV Therapy/Insertion
- Basic/Advanced Airway Maneuvers
- Surgical Airways
- Chest Tube Placement
- Transcutaneous/Transvenous Pacing
- Cardiopulmonary Resuscitation
- Procedural Sedation
- Suturing
- Code Blue Team Training
- Customized Procedural Training

Visit www.abiakron.org/csihe to review sample course agendas and scenarios.

Simulation Education

CSIHE is committed to nurturing provider talent and improving patient outcomes through high-fidelity simulation-based education that:

- Replicates high-risk and low-frequency life-threatening situations through realistic scenarios
- Teaches both procedural skills and cognitive-based patient care, with opportunities to “bring it all together” with patient actors and simulators
- Encompasses common and uncommon presentations and procedures
- Reinforces effective communication, emergency and safe care practices
- Facilitates training, assessment and reporting of core competencies for ACGME and other accrediting bodies

The facility and instructional design create the most realistic conditions possible to mirror the demands that healthcare professionals face every day.

Curriculum Offerings and Specialty Design

Whether your training needs are standardized, or you would like a custom program, CSIHE can help. Use your own curriculum and faculty, or consult with our experienced staff and faculty to design programs that meet your specific needs.

Our team is available to assist with course planning, instruction, coordination and course day support.

“CSIHE's Boot Camps are an important training method for our residents, teaching the critical clinical management and leadership skills essential for high quality patient care.”
